Le Cafe' & Farmers Market

SKETCH UP & LUMION

Le' Cafe and Farmers Market is a neighborhood hangout and year round market place.

The purpose of this design is to bring together the community by creatively combining indoor & outdoor space. The space has been designed to be a fun and active destination through out the day and night year round. A large garden and green space connects the buildings and encourages patrons to stop and enjoy the area anytime. The bar doubles as a coffee and juice bar in the morning at night. It is located centrally with easy access from the patio creating a smooth transition to the outside. Rolling glass doors make the Farmers market options for expansion during the spring and summer months. Rent-able outdoor booths gives locals another reason to stop by.

Easter Seals Multipurpose

REVIT, ENSCAPE, LUMION & PHOTOSHOP

The redesign of the multi-purpose room at Easter Seals, a school for children and teens with special needs, focuses on neurodiversity.

Anxiety, common in the neurodiversity, is calmed through this simple way-finding in this floor plan.

Experience of living with a child with neurodiversity combined with evidence based research proves the importance of using colors and patterns that do not 'hurt', clear way finding, acoustics, and all inclusiveness. The slightly raised stage allows for inclusivity. Adding yellow to the edge makes this a possibility by accenting the slope. Acoustic ceiling panels add comfort by lowering the height of the ceiling and, combined with the wall tiles, reduce noise discomfort. Multiple options for lighting gives the user control over ambiance.
